

(a) Candidates and their a_i

one teacher-forced pass per candidate

(b) Reductions to one score z

First token $z = a_1$

Summed $z = \sum_i a_i$

Length-norm. $z = T^{-1} \sum_i a_i$

DC-PMI $z = \sum_i a_i - \log P(\text{cand} \mid \text{prem.})$

softmax over options $\rightarrow \mathbf{p}$; loss = TVD($\mathbf{p}, \mathbf{y}$)
